Building and history

Launched in 2020, this Sunreef Power 80 is an exclusive motor yacht blending extrem comfort, elegance and bespoke interior design with cutting edge technology. She is part of the popular 80 Sunreef power range that was awarded "best power driven catamaran" at the 2020 World Yacht Trophies and has been operating as a highly successful charter yacht with her current owner. The 80 power is a majestic yacht boasting modern, sportly lines offering unmatched stability and seaworthiness in supreme luxury.

This yacht's deluxe interior is made up of natural materials, cozy textures and a chic palette of brown, grey and earthy tones to create an indulgent, glamorous, yet peaceful atmosphere onboard. Natural sunlight is always a feature of the interior as it floods through the panoramic windows and skylights.

The exterior space on this yacht has been carefully considered to give guests maximum opportunity to relax and

socialise and also provides space for outdoor yoga and fitness sessions. Inside the vast aft cockpit, guests enjoy the dining area with a fixed table, large daybed and fully- equipped wet bar. The full-height glass doors fully retract, that means the stern cockpit opens wide onto the main deck saloon which is a great option for socialising with guests, with a dining area to port and a lounging space to starboard.

The vast flybridge not only offers some of the best views in the house, but it is another great area for relaxation, with a large U-shaped settee and sunpads. It is also the ideal spot for a party or social gathering as guests make the most of the wet bar with barbecue, fridge and ice maker for the most refreshing cocktails!

The Power 80 comes with smart storage options, with the aft garage accommodating a personal watercraft, a selection of water toys and a refueling station. The yacht's hydraulic aft platform not only carries the tender, but also acts as a swim platform or beach club when lowered allowing guests to feel closer to the water.

She offers accommodation for a full-time professional crew.

Hulls, deck, flybridge and all structural bulkheads constructed for E-glass sandwich laminate with reinforcement by infusion process.

Numerous upgrades have been added to the yacht's equipment.
